

Feature	Recommended Datasets
Startup Failure Predictor	CB Insights Failures, Crunchbase Success/Fail, Sakharebharat Dataset
Graveyard Intelligence Engine	CB Insights Failures (483 startups), Crunchbase Data
Market Pulse Engine	sovai News Sentiment, FinMarBa, IMF/World Bank
Founder DNA Analysis	PANDORA Big Five, MBTI Dataset, agentlans OCEAN
Indian Market Focus	Indian Startup Funding 2024, Investment Trends 2000–2023
Multiverse Simulator	Crunchbase Investments, Startups & Funding 2024–25

1. Startup Failure & Success Prediction

These are the core datasets for your Startup Failure Predictor and Graveyard Intelligence Engine.

Kaggle

- Startup Failure Prediction Dataset** — A comprehensive dataset for predicting startup success or failure based on key business indicators.
<https://www.kaggle.com/datasets/sakharebharat/startup-failure-prediction-dataset> Kaggle
- Big Startup Success/Fail Dataset from Crunchbase** — Dataset for startup success prediction sourced from Crunchbase.
<https://www.kaggle.com/datasets/yanmaks/big-startup-secsees-fail-dataset-from-crunchbase> Kaggle
- Startup Failures (CB Insights)** — Catalogs 483 failed ventures across diverse industries including names, sectors, years of operation, funding raised, and reasons

for failure. Spans over three decades (1992–2024).

 <https://www.kaggle.com/datasets/dagloxxkankwanda/startup-failures> [Kaggle](#)

- **Crunchbase Company Data** — Open-sourced by Crunchbase for building startup prediction models.

 <https://www.kaggle.com/datasets/chhinna/crunchbase-data>

2. Startup Funding & Investment Data

Essential for the Market Pulse Engine and Similar Startup Discovery features.

Kaggle

- **StartUp Investments (Crunchbase)** — Information about startup companies and investment rounds via Crunchbase, one of the most widely used datasets for funding analysis.

 <https://www.kaggle.com/datasets/arindam235/startup-investments-crunchbase> [Kaggle](#)

- **Startups & Funding Dataset (2024–2025)** — Tracks funding rounds of top startups globally, highlighting industries, raised amounts, investors, and funding stages. Useful for funding trend analysis and ML models for startup success/failure prediction.

 <https://www.kaggle.com/datasets/sufya6/startups-and-funding-dataset-20242025> [Kaggle](#)

- **Startup Investments (Justinas)** — Another curated funding rounds dataset.

 <https://www.kaggle.com/datasets/justinas/startup-investments>

Hugging Face

- **HackerNoon/where-startups-trend** — Includes tens of thousands of startups with metadata like homepage and company description, as well as 600K+ votes for startups across cities worldwide.

 <https://huggingface.co/datasets/HackerNoon/where-startups-trend> [HackerNoon](#)

- **VC Startup Evaluation for Investment** — Dataset focused on VC evaluation criteria.

 <https://huggingface.co/datasets/gauravshrm211/VC-startup-evaluation-for-investment>

- **TuningAI/Startups_V2** — Startup profiles dataset for AI training.

 https://huggingface.co/datasets/TuningAI/Startups_V2

3. Indian Startup Ecosystem (Highly Relevant)

Kaggle

- **Indian Startup Funding Data 2024** — A comprehensive dataset capturing Indian startup funding activity in 2024.

 <https://www.kaggle.com/datasets/aniketdash7/indian-startup-funding-data-2024> [Kaggle](#)

- **Indian Startup Funding 2023**

<https://www.kaggle.com/datasets/venkateswarlukuruva/indian-startup-funding-2023>
Kaggle

- **Indian Startup Funding (2015–2019)** — Contains 3,000+ records with city, industry, investors, and funding amounts.

 <https://www.kaggle.com/datasets/sudalairajkumar/indian-startup-funding>

- **Investment Trends in Indian Startups (2000–2023)** — Covers 12,428 startups across various sectors, funding stages, and geographies in India, including ESG scores, diversity indices, and technology stacks.

 <https://www.kaggle.com/datasets/ankushpanday1/investment-trends-in-indian-startups-20002023>

4. Founder DNA & Personality Analysis

For the Founder DNA Analysis feature.

Hugging Face

- **Big Five Personality Traits Dataset** — AI-generated descriptions of personality traits based on the Big Five (OCEAN) model, supporting persona creation and comparative language analysis.

 <https://huggingface.co/datasets/agentlans/big-five-personality-traits> [Hugging Face](#)

- **PANDORA Big Five Traits (Reddit)** — Subset of Reddit comments with Big Five personality trait scores for 10K+ users, the only dataset containing personality-relevant information across multiple personality models.

 <https://huggingface.co/datasets/Fatima0923/Automated-Personality-Prediction>
[Hugging Face](#)

- **MBTI Personality Dataset**

 <https://huggingface.co/datasets/jingjietan/kaggle-mbti>

Kaggle

- **MBTI Personality Type Dataset** — Social media posts labeled with Myers-Briggs personality types.

 <https://www.kaggle.com/datasets/datasnaek/mbti-type>

5. Market Intelligence & News Sentiment

For the Market Pulse Engine that tracks real-time trends.

Hugging Face

- **News Sentiment Dataset (sovai)** — Comprehensive news sentiment analysis with ticker-matched and theme-matched data including metrics on sentiment, tone, polarity, and article count. Useful for gauging public perception and potential market impacts.

 https://huggingface.co/datasets/sovai/news_sentiment [Hugging Face](#)

- **Financial Sentiment Analysis (PhraseBank)** — Financial news headlines categorized by sentiment from a retail investor perspective, derived from Malo et al.

(2014) research on semantic orientations in economic texts.

 <https://huggingface.co/datasets/mltrev23/financial-sentiment-analysis> [Hugging Face](#)

- **Financial Headlines Market-Based (FinMarBa)** — 61,252 annotated Bloomberg headlines from 2010–2024 with market-informed sentiment labels.

 https://huggingface.co/datasets/baptl/financial_headlines_market_based

6. Macroeconomic & Market Indicators

For incorporating economic indicators into your predictions.

- **World Bank Open Data** — 9,000+ indicators covering GDP, inflation, employment, trade, and more across all countries.
- **IMF World Economic Outlook Database** — Includes national accounts, inflation, unemployment rates, balance of payments, and fiscal indicators from 1980 to present with 5-year projections.

 <https://data.worldbank.org/indicator>

 <https://data.imf.org/en> [IMF](#)

- **OECD Statistics** — Quarterly economic statistics for 30+ countries.

 <https://stats.oecd.org>

7. Industry & Sector-Specific Data

Kaggle

- **Business Failure Prediction** — Business failure data across sectors.

 <https://www.kaggle.com/datasets/krishna200/business-failure-prediction>

- **Startups (Crunchbase, by Amirataha)** — Multi-sector startup data.

 <https://www.kaggle.com/datasets/amirataha/startups>
